ELANE

MARITIME INTELLIGENCE POWERHOUSE

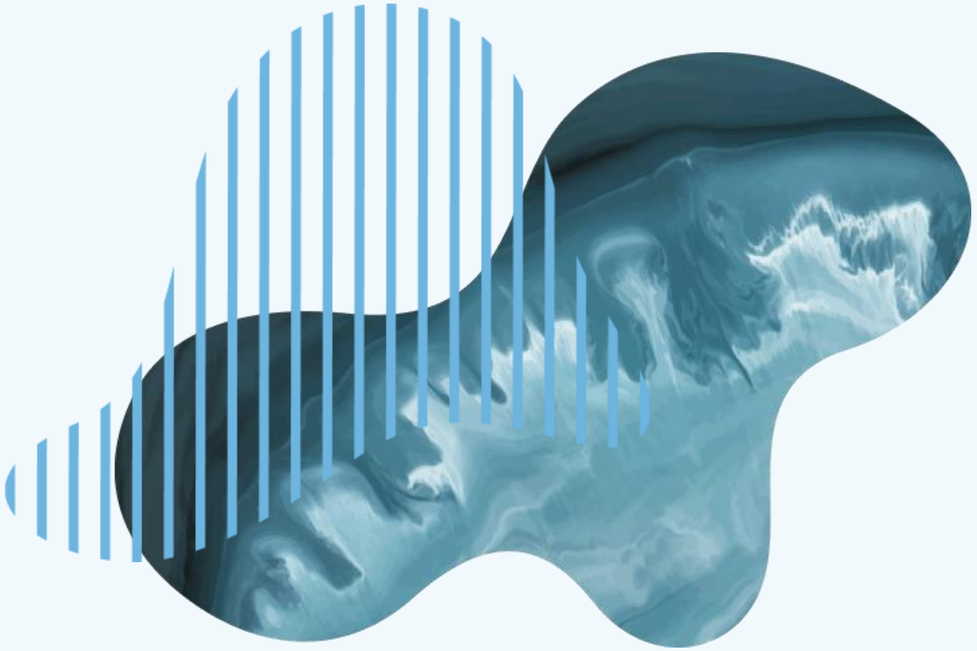
Elane Global

Navigating the Future with Data Intelligence

Our company

Since its inception in 2003, Elane has been at the forefront of maritime technology innovation, leading the digital transformation with customer-centric approach.

As a leading AIS (Automatic Identification System) network services provider and pioneer in maritime big data applications, we fuse cutting-edge technologies like AI and big data with industry practices to enhance marine security, optimize logistics, and manage financial risks.



Our dedication to providing robust tech solutions and professional services across various industries has earned us the trust of our customers, and we are committed to be your most reliable maritime technology partner worldwide.

Our Tenets

E

Embracing the power of data

We harness the limitless potential of maritime data to deliver profound insights and precise decision-making support for our customers.

L

Leveraging industry practice

We understand industry challenges, and use hands-on experience to develop tailored solutions that address industry challenges effectively.

A

Advancing through innovation

Innovation is our core driver. We are relentlessly exploring opportunities to fuse new technology with maritime sectors, contributing to industry advancement

N

Nurturing enduring partnerships

We prioritize long-term relationships with customers and partners. Together, we grow, progress, and create value.

E

Enabling sustainable development

We are committed to driving digital innovation of the industry, using advanced technology for intelligent, green, and sustainable development.
